Record of Inspection of Waste Oil Dealers - Environmental Waste Control Inc.  
Inkster, Michigan

Robert W. Bowlus, Sanitary Engineer  
THRU: A.R. Winkhofer, Director, EDO

US EPA RECORDS CENTER REGION 5

507348

Enforcement Division (5E)  
Attn: Michael Mutnan

Acting on a memo request dated November 20, 1979, the writer visited Environmental Waste Control Inc. at 11:00 A.M. January 22, 1980 and 2:00 P.M., January 24, 1980 to determine the source of PCB's at the facility and where the contaminated oil has gone. A separate Written Notice of Inspection was provided the company on each day of the inspection.

On January 22, 1980 the writer met with Mr. Carl Hornby, Executive Vice President. He was given the letter of intent to inspect and reported that his technical man had a death in the family and would like us to come back a few days later so we could meet with him. It was explained that our inspections were all unannounced, and that we could not put off the inspection due to other commitments. Mr. Hornby then asked this writer to wait in the lobby while he made some telephone calls. After waiting for about one-half hour the writer was reluctantly allowed to inspect the company records.

Mr. Hornby explained that since the records also contained pricing information and the letter did not request pricing information, he was reluctant to allow the records to be examined. He also explained that if he had been given some time he would have prepared a list of the oil sources and purchasers from their records. (Note: the company did not respond to Enforcement's letter requesting that they make their records available.)

Mr. Hornby reported that their analyses of the three way split sampling (1/23/79) showed only 2 ppm and that the one MDNR's lab had was 4 mg/l. The U.S. EPA sample was analyzed at 13.1 mg/l. Mr. Hornby thought that their lab results and MDNR's lab results had better correlation.

The oil was analyzed by:

Chemical Industrial Services, Inc.  
2616 Clifford St.  
Detroit, Michigan 48201

The samples sent to the lab on 7-25-79 contained a portion of the oil and part of the oily sludge. The oil fraction had 0.04 ppm and the oil sludge contained 2.4 ppm PCB's. The report control Number was 779-596. A sample sent to CIS lab on 12-4-78 was reported as non detectable. However, the report did not state the lowest detectable limits of PCB's. This report carried a control number of 1278-8A.

EWCI has now contracted with Analytical and Biological Laboratory Inc.

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

30754 Ford Rd., Garden City, MI, 48135, Phone (313) 422-7474. This lab reports that they have certification from USDA, USDEA, USFDA, USNRC, American Council of Independents, Michigan Board of Pharmacy, and a Clean Water Act Certification, State of Michigan.

Samples sent to A&B Labs on 8/18/79 and 8/16/79 were from the following:

Sample No.	Source	Results mg/l
D.E.T.	Detroit Edison transformer oil	<0.01
M.F.	Massey Ferguson, Van Born	0.13
P.1	Front Pond EWCI	0.03
P.2	Buck Pond EWCI	0.03
B.D.	Budd Co. Detroit	0.08
F.E.	Ford Ensite Water Oil (Canada)	<0.01
S.O.L.	Soluble Oil Shipped 8/8 to Ford Ensite (Canada)	0.09

Attachment 1 is a listing of the companies which are under contract to EWCI for waste oil removal. Attachment 2 is a listing of the companies which purchase oil from EWCI. Comparing the companies on Attachment 1 to the waste haulers records (MDNR's Liquid Industrial Waste Removal Record), several companies were noted on the MDNR records that were not listed in the companies record of suppliers. These companies are indicated by yellow highlighter on Attachment 3 (March records only) and are primarily waste acids generators.

The company does have what they call a PCB "suspect list." This is not a written formal list as such and in discussions with their technical man it was indicated that Detroit Edison and other companies which may have tainted oil are on the "list". He did not elaborate further on this subject.

R. Bowlus/LAS

REGION VTO: William H. Sanders III, Director  
Surveillance & Analysis Division

This is a request for record inspections at the following facilities. The reason for the inspections will be to determine the source of PCB's at the facility and where PCB contaminated oil has gone.

The facilities have been sent letters requesting they voluntarily make available their records after sampling showed PCB's to be present. All facilities except Environmental Waste Control Incorporated have consented to making the records available to the U.S. EPA. Environmental Waste Control Incorporated has not responded to the letter.

If you have any questions or need further assistance, please contact Michael Mutnan of my staff at (312) 353-2110.

The facilities to be inspected are:

Name	Location	Owner
Petroleum Specialties Inc.	2023 Riverside Drive Trenton, MI.	Stewart Fenner
Pierce Waste Oil Co. Inc.	1925 E. Madison Springfield, IL.	Martin Pierce
Donavan Oil Service	RR1 Oakwood, IL.	Martin Pierce
Usher Oil Co.	2205 W. 3rd St. Cleveland, OH.	Benjamin Bacon

230 SOUTH DEARBORN ST.  
CHICAGO, ILLINOIS 60604

Attachment No. 5

Name of Firm: ENVIRONMENTAL WASTE  
CONTROL INC.  
Firm Address: 27140 Princeton Ave.  
Inkster, MI

Date Inspection Commenced: Jan 22 1980  
Hour: 11:00 AM

Reason for Inspection:

☒ For the purpose of inspecting (including taking samples, photographs and other inspection activities) an establishment, facility, or other premises in which chemical substances or mixtures or articles containing same are manufactured, processed or stored, or held before or after their distribution in commerce (including records, files, papers, processes, controls, and facilities) bearing on whether the requirements of the Act applicable to the chemical substances, mixtures or articles within or associated with such premises have been complied with.

☒ For the purpose of inspecting (including taking samples, photographs and other inspection activities) a conveyance being used to transport chemical substances, mixtures, or articles containing same in connection with their distribution in commerce (including records, files, papers, processes, controls and facilities) bearing on whether the requirements of the Act applicable to the chemical substances, mixtures or articles within or associated with the conveyance have been complied with.

☐ In addition, this inspection extends to (circle appropriate letters):

- A) Financial data
- B) Sales data
- C) Pricing data
- D) Personnel data
- E) Research data

The nature and extent of inspection of such data specified in A through E above is as follows:

Name of Person to Whom  
Notice of Inspection Was Given:

Carl Hornby  
Ex Vice President  
(Title)

Signature of EPA Employee:

Robert W. Borden Date Jan 22 1980  
Sanita C. Cramer  
(Title)

## **TSCA NOTICE OF INSPECTION**

### **Authority to Conduct Inspections**

By authority of Section 11 of the Toxic Substances Control Act (15 USC 2601) an authorized representative of the Administrator of the United States Environmental Protection Agency may enter and inspect, at reasonable times, any establishment facility, or other premises in which chemical substances or mixtures are manufactured, processed, stored, or held before or after their distribution in commerce and any conveyance used to transport chemical substances, mixtures, or such articles in connection with distribution in commerce.

### **Scope of Inspections**

Inspections conducted under Section 11 of the Toxic Substances Control Act (15 USC 2601) extend to all things within the premises or conveyance inspected (including records, files, papers, processes, controls, and facilities) bearing upon whether the requirements of the Toxic Substances Control Act applicable to the chemical substances or mixtures within the premises or conveyance have been complied with.

However, inspections shall not extend to the following types of data unless the nature and extent of such data are described with reasonable specificity in the written notice presented to the owner, operator, or agent in charge of the premises or conveyance:

1. Financial data
2. Sales data (other than shipment data)
3. Pricing data
4. Research data (other than research data required by the provisions of the Toxic Substances Control Act or under a rule promulgated thereunder)
5. Personnel data.

### **Penalties for Failure to Allow Inspection**

Section 15 of the Toxic Substances Control Act makes it unlawful for any person to fail or refuse to permit entry or inspection as required by Section 11 or to fail or refuse to permit access to or copying of records. Section 16 provides for both civil and criminal penalties for violations of Section 15. Section 17 authorizes specific enforcement, including the obtaining of an injunction to restrain any violations of Section 15.
